Description :

Prsentation de l'diteurCultwick: The Sweeper Bot Plague tells the story of a group of rebels known by the moniker of the Chromework Confederacy, as they uncover the truth behind the malady that has been ravaging the empire for more than two decades. Told from the perspective of six distinct characters, Cultwick: The Sweeper Bot Plague serves as an introduction to this world of strange science, technological marvels, and a government striving for utter domination over its empire.Erynn Clover, a young chromesmith working in Cultwick City with an appalling streak of bad luck, is chosen by the government run lottery to participate in genetic experiments. Though the intention of these experiments is purported to be for the

eradication of the Sweeper Bot Plague, Erynn has her doubts. Rather than submit to the governments edict, Erynn flees to the western frontier, branding herself as a heretic and inadvertently dragging her family into the empires crosshairs. For their part, the Cultwick government refuses to let any citizen selected by the lottery escape from their responsibilities as a part of the ongoing experiments, so the empress sends Operative Alice Page after the heretic. Alice, a highly religious woman following the tenets of the Church of Biosynthesis, follows Erynn westward on orders to find her, force her to return to Cultwick City, and ultimately face the deathly consequences of her actions.
